

# HS

## EXPECT THE BEST

**ABOUT HS** - With 30 years of experience in production of firearms, HS has grown into one of the leading manufacturers of top-quality small arms with one of the largest production factories in the world. Ever since its foundation, advanced thinking has been the focus of HS manufacturing which was the main factor for the international success of the HS pistol line, developed using latest technological achievements and real combat experience.

Following HS pistol line's success, a surge in demand for HS products enabled the company to make significant investments in manufactur-

ing facilities, equipment and engineer workforce, making HS one of the manufacturing leaders on the international market.

HS today takes pride in its reputation for delivering innovative, high-performance quality firearms with strong focus on development of technologically advanced and reliable products. Every HS product is developed using years of expertise, ensuring that the final products reflect our commitment to excellence and safety. This is recognised by both experts and end users who repeatedly award our top-class handguns.

## H11 PRO RDR

## H11 PRO RDR

H11 PRO RDR brings the full-size performance in a compact design. PRO comes with extended slide, 3.7" barrel and full size grip. H11 PRO RDR features everything we know and love in H11; hammer forged barrel and forged slide with Melonite protective finish. Especially design adaptive grip texture in combination with full size grip enable exceptional control during rapid fire. Pistol comes with pre-cut slide for mounting different reflex sights, but is also equipped with fiber optic front sight, and dovetailed rear U-notch sight. Slide has front and back serrations for easier manipulation. H11 PRO RDR is equipped with two safeties – trigger safety, firing pin safety and loaded chamber indicator. Magazine release is reversible type and can be adjusted for left-handed or right-handed shooter. Pistol comes with two stainless steel magazine with capacity of 15+1. Bridging the gap between micro-compact and full size pistols, H11 PRO RDR is perfect concealed carry choice.

**Advantages/key features:**

- compact size/short overall length
- modularity & manoeuvrability
- highest operational versatility, easy to operate in confined spaces & easy maintenance
- no external moving parts on weapon during firing
- changing position of the ejection port without using special tools or spare parts
- left handed shooters can shot with the right positioned ejection port or vice versa
- options between flat or magazine with coupling attachment points

# MAXIMUM SAFETY

**Three separate safety mechanisms and 2 different indicators protect the user from accidental firing and provide additional safety**

## RELIABILITY AND DURABILITY

High-quality materials used in the production process and robust design, make HS pistols extremely durable and reliable in all extreme conditions.

## EXCELLENT ACCURACY

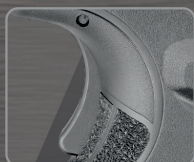

Ultra-precision machining enables us to manufacture close tolerance components. The accuracy of the HS pistol will impress even the most demanding shooters.

## OPERATING CONDITIONS

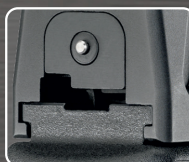

The pistol was tested by NATO standards and showed excellent results in various extreme conditions such as high temperatures, conditions below zero, humidity, dust and sand etc.

## EASY MAINTENANCE

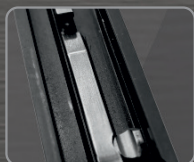

Field strip of HS pistols can be done without use of any tools. Highly durable parts require minimum maintenance and cleaning.

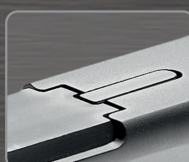

**GRIP SAFETY**  
prevents firing in case a user does not hold the receiver firmly.

**FIRING PIN STATUS INDICATOR**  
Visual and tactile indicator for firing pin. When activated, the firing pin is cocked, behind the sear and ready to shoot.

**FIRING PIN SAFETY**  
does not allow the release of the firing pin without pulling the trigger

**LOADED CHAMBER INDICATOR**  
Visual and tactile indicator for barrel chamber. When activated, the bullet is in chamber.

**TRIGGER SAFETY**  
prevents unintentional moving of the trigger backwards.

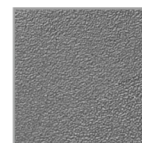

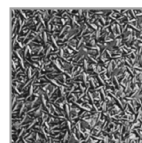

# HS-9 G2

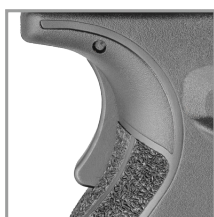

## HS-9 G2

HS-9 G2 is a striker fired polymer-frame pistol. With reduced dimensions, slimmer grip profile and high capacity magazine, HS-9 G2 is ideal service weapon or a backup gun. Three independent safety features (grip safety, trigger safety and firing pin safety) and two indicators (loaded chamber and firing pin status indicator) provide maximum safety for the user. Ergonomics and reliability makes HS-9 G2 a great all around gun. Each pistol is delivered with 2 magazines.

# S7 & S5

## S7 & S5

S7 and S5 is a single stack concealed carry, striker fired polymer-frame pistol. A slim contour and single stack magazine makes this model highly concealable. Deep slide serrations and extended beaver-tail enable easier manipulation and better recoil control during rapid fire.

Equipped with grip safety, trigger safety, firing pin safety, and loaded chamber indicator to provide maximum safety for the user. Small frame, lightweight and reliability make S7 an excellent concealed carry pistol. Each pistol is delivered with one magazine from each size

## VHS-2S

## VHS-2S

The VHS-2S is a fully ambidextrous .223 calibre semi-automatic rifle. Designed on bullpup modular platform with proved short-stroke gas piston operating system, it maintains all the ballistic benefits of a longer barrel in a shorter package, without sacrificing overall length, accuracy and muzzle velocity. The adjustable gas-block works in two modes: suppressed and unsuppressed.

The polymer receiver is equipped with an 5 point adjustable buttstock. The rifle is equipped with a NATO STANAG 4694 rail and adjustable flip-up iron sights. Front handguard has M-LOK mounting system at the 3, 6, and 9 o'clock positions. Pistol grip is removable and compatible with M4/AR-15 style grips.

The rifle is equipped with an ambidextrous dual system of sling attachments; QD socket on front handguard, upper receiver and buttstock with eyelet attachment for sling snap hook on upper receiver and on the buttstock. VHS-2S is compatible with STANAG 4179 magazines. Combination of all of this with dual dust cover ejection ports on both sides of the receiver and specially designed empty case defectors create flexible and user friendly multi-purpose rifle.

**Advantages/key features:**

- compact size/short overall length
- modularity & manoeuvrability
- highest operational versatility, easy to operate in confined spaces & easy maintenance
- no external moving parts on weapon during firing
- changing position of the ejection port without using special tools or spare parts
- left handed shooters can shoot with the right positioned ejection port or vice versa
- options between flat or magazine with coupling attachment points

**Technical data:**

Item no.	069351	Weight of magazine (empty):	134 g
Model	Semi-automatic rifle	Overall length:	710 mm / 760 mm
